About the Seminar:
Cloud-powered technologies have fundamentally transformed every aspect of our lives: from mundane day-to-day tasks, to our lifestyles and habits. We have seen and continue to see its potential harnessed in the sectors of transportation, healthcare, financial services, and its role in improving the lives of people worldwide. Given the speed of development around ICT technologies, we seek to add to ongoing conversations around the future of work and the importance of a future-ready Philippines.

The Asia Cloud Computing Association (ACCA) invites you to this roundtable to present and seek feedback on the fourth industrial revolution. As part of our Asia-wide outreach, this seminar will focus on the future of work in the Philippines and ways to build a future-ready Philippines.
